

GOLEM

It is an optimal solution for long-lasting transfusion or dialysis. A comfortable chair for all patient's positions; travelling version with Ø 75 mm braked wheels. Modern design with soft upholstery and grey plastic casings. The four-segment operating surface with overall dimensions of 615 × 2 000 mm is covered with artificial leather in a colour of your choice; it is divided into a head segment, a backrest, a seat and a leg segment. The head segment is adjusted manually; an infusion stand, which can be used for both sides, is included in the standard equipment.

The chair has removable washable infusions hand rests that can be adjusted in all directions and tilts.

The build-in dimensions of the chair are approx. 900 × 1 100 mm in the sitting position, 900 × 2 000 mm in the lying position.

Carrying capacity: 150 kg, weight: 35 – 60 kg.
