

A comfortable chair for sample taking in the sitting, half-lying and lying position. Modern design with comfortable upholstery and grey plastic casings. Travelling version with Ø 75 mm braked wheels. The four-segment operating surface with a width of 480 mm is covered with seamless artificial leather in a colour of your choice; it is divided into a head segment, a backrest, a seat and a leg segment. The head segment can be adjusted manually; the leg segment can be manually tilted for the lying position.

The chair has removable washable infusions hand rests that can be adjusted in all directions and tilts. The build-in dimensions of the chair are approx. 600 × 900 mm in the sitting position, 600 × 1 770 mm in the lying position. Carrying capacity: 150 kg, weight: 35 – 60 kg.
