

GOLEM

GOLEM ENT operating table is specially designed for operation in ophthalmology, ENT, dermatology and plastic surgery. Doctors in these fields will be maximally satisfied with some specific adjustments to this model.

The work area is divided into 4 segments (legs, seat, back, head) and is adjustable in height and Trendelenburg position. Also inclinations foot, the back and the head segment is adjusted electrically. All these moves are executed five silent, reliable electric LINAK with hand control. The table is equipped with electronic memories of 4 positions that can be easily accessed by pressing a button (for example, the starting position, work location, location „0“)

Positioning of segments is performed. Wide range of positions allows the patient to be seated in a sitting position and adjusting positions to working position effortlessly.

The head segment allows the lean forward/back and can also adjust the height of the patient. For head segment is placed removable and adjustable support arm of the doctor.

The table has a fixed and stable stainless steel construction, washable and disinfected desktop with trim black antistatic leatherette. Around EUROrails segments are placed for fastening of any accessory.

The standard version of the table is traveling with centrally braked castors Ø 100 mm. Power is from a standard desk drawer, but the table is equipped with a built-in fully automatic charger and maintenance-free batteries for case of power failure.

GOLEM 4 T pro ENT Code Nr. G 50 14

Operating table for ofthalmo/ENT/plastic surgery

Technical parametres:

Overall table length	2030 mm
