

GOLEM

An elegant and practical solution for ambulance examination in gynaecological offices. Not only facilitating ultrasonic examination for both the doctors and patients, they are also suitable for standard examinations in the lying position. The shape, dividing, and setting of individual segments allow for comfort even if a vaginal probe is used. A high level of operator and patient safety and operating hygiene is ensured by the covering of the bottom frame and moving mechanism of the table with washable plastic casings. The 630 × 2000 mm operating surface is covered with artificial leather in a colour of your choice; it is divided into a back segment, seat, and leg

segment. The back segment tilt can be adjusted; the seat tilt is always adjustable by electric drive; the leg segment remains fixed. All electric drives are operated manually and the positions can be changed even if the table is fully loaded.

The basic version is stationary and has a paper roll holder under the head. The paper can be used for the seat, seat and backrest, or for the whole table.

The build-in dimensions of the table are approx. 630 × 2000 mm.

The weight of the table is 65 – 94 kg, the carrying capacity is 150 kg.

GOLEM UP

Code Nr. G 06 50

Fixed height 600 mm, electric drive adjustable seat tilt of 0° to +30°, manually adjustable backrest.

GOLEM U

Code Nr. G 06 51

Electric drive adjustable height of 600 – 900 mm, electric drive adjustable seat tilt of 0° to +30°, manually adjustable backrest.

GOLEM UE

Code Nr. G 06 52

Electric drive adjustable height of 600 – 900 mm, electric drive adjustable seat tilt of 0° to +30°, electric drive adjustable back tilt of 0° to 70°.

Table for ultrasonic examination
