

GOLEM

table for gynaecology and urology

GOLEM 6ET model 200

Specially designed to provide medical care for disabled, invalid, amputees and elderly patients

The modified version of the GOLEM 6ET table is designed primarily for examinations and interventions of the physically handicapped, for which it is mainly intended with its minimum entry height of 450 mm. This enables the person to enter directly from a wheelchair. Thanks to the sophisticated design, the patient can still be lifted up to a height of over 1,000 mm (front end of the seat).

The design of the table in this version is adapted for the comfort of the person being examined as well as the staff.

The table base is equipped with high quality braked wheels with increased load capacity. This makes the table completely stable during performance, yet it can be moved around if necessary without any effort from staff. Covering the base with plastic covers makes maintenance very simple.

The 620 mm wide work surface is covered with seamless leatherette in the colour of your choice and divided into a seat with gyn opening, a backrest and a headrest. The lengths of the segments are: seat 470 mm, backrest 520 mm, head 430 mm, making a total length of 1 420 mm. The table is fully equipped with: polyurethane goepels or heel support (according to your request) with articulated grip and fixing to the EURO rails along the seat (these are part of the standard equipment), removable patient handles with fixing to the EURO rails along the seat, doctor's footrest, stainless steel bowl, paper roll holder. All elements can be easily and conveniently adjusted for patient and staff comfort.

After removing the goepels support and handrails, the patient can also enter the table from the side!

Technical parameters:

Weight of the table is 110 kg, load capacity 200 kg

Table dimensions are approx. 800 x 1 500 mm

Height is adjustable by electric drive 450 – 850 mm

Backrest tilt adjustment by electric actuator 0°+ 70°

Seat tilt adjustment (Trendelenburg) with electric actuator 0°+ 25°

Gas spring adjustment of the head section inclination ± 25°

All electric drives are controlled by a hand control and position changes can be made even under full load

Each table can be supplemented with additional accessories according to your wishes:

EURO rails around the backrest

code Nr. D 04 10

LED lamp on flexible holder

code Nr. D 06 05

Colposcope holder for left/right hand of the doctor

code Nr. D 06 80

Bowl with outlet and hose

code Nr. D 06 08

Bowl with outlet, hose and waste container

code Nr. D 06 09

Accessories for mounting on EURO rails:

Hand holder during infusion

code Nr. D 06 12

Infusion holder

code Nr. D 06 13

Mouthpiece holder

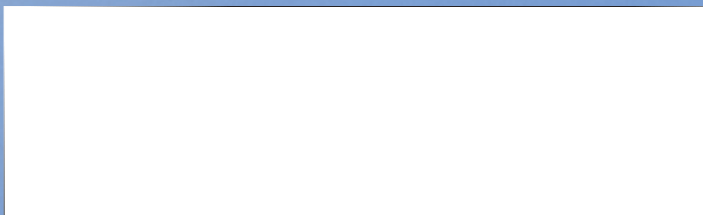

code Nr. D 06 14

Fastening strap

code Nr. D 06 15
